Profile

Full-Stack Web Developer — Expert in building WordPress themes and plugins.

Experience

WEB DEVELOPER, HEILIND ELECTRONICS; SMITHFIELD, RI — 2025–2026

Developed PHP caching script for MySQL database queries of several million products. Implemented responsive product layout with Sass/JavaScript utilizing AJAX to load JSON data. Coded custom scripts and WordPress plugins to add site wide multilingual support. Migrated legacy pages from ASP to PHP, and maintained live web support.

FULL-STACK WEB DEVELOPER, FREELANCE; REMOTE — 2020–2024

Built WordPress themes and plugins using PHP, JavaScript/jQuery, Sass, and managed Linux servers, and MySQL databases. Performed full CMS migrations from legacy database to modern WordPress architecture using REST API to implement AJAX filters. Recent sites include: lrnewenergy.com, lightwaverecruiting.com, inera.com, and prospermj.com.

WEB DEVELOPER, CHAMP INTERNET SOLUTIONS; NEWTON, MA — 2018–2020

Developed WordPress themes and plugins with JavaScript/jQuery, CSS3/Sass modules, and created custom theme for site redesign. Setup Ubuntu Linux servers and automated deployment pipelines with GitHub Actions. Trained employees on version control and workflow best practices. Tested code for ARIA accessibility standards, SEO, and mobile device support.

WEB DEVELOPER, WORLDWAYS SOCIAL MARKETING; NEWPORT, RI — 2017–2018

Developed non-profit site redesign and careers portal integrating JSON data from third-party REST API. Built responsive WordPress templates with JavaScript/jQuery, CSS3/Sass, Bootstrap and Foundation frameworks. Led client training sessions on website usage and best practices. Improved SEO scores with performance and accessibility testing.
