## Profile

Full-Stack Web Developer – Expert in building custom WordPress themes and plugins.

## Experience

### **WORDPRESS DEVELOPER, CONTRACTOR; REMOTE – 2020-PRESENT**

Build WordPress themes and plugins with PHP, JavaScript/jQuery, Sass, and manage Linux servers, Apache, and MySQL databases. Perform CMS migrations with AJAX filters, and implement SEO accessibility audits to increase overall performance. Sites recently launched include: [lnnewenergy.com](http://lnnewenergy.com), [openphilanthropy.org](http://openphilanthropy.org), [lightwaverecruiting.com](http://lightwaverecruiting.com), and [aircuity.com](http://aircuity.com)

### **WORDPRESS DEVELOPER, CHAMP INTERNET; NEWTON, MA – 2018-2020**

Developed WordPress themes, plugins, and responsive CSS3/Sass modules. Created custom theme for company website redesign. Setup Ubuntu Linux servers and automated deployment pipelines with GitHub Actions. Trained employees on version control and workflow best practices. Optimized sites for mobile devices, SEO, and accessibility standards.

### **WEB DEVELOPER, WORLDWAYS SOCIAL MARKETING; NEWPORT, RI – 2017-2018**

Developed WordPress themes with PHP, JavaScript, jQuery, and Sass, and performed accessibility testing. Built careers portal integrating data from a third-party JSON API. Led client training sessions on website usage and best practices. Conducted SEO and accessibility tests resulting in optimal Google search rankings and scores.

### **WEB DEVELOPER, JACKRABBIT DESIGN; MILTON, MA – 2016-2017**

Built responsive websites using JavaScript/jQuery, PHP, and CSS3/Sass. Coded dynamic large-scale email campaigns in MailChimp and ConstantContact. Established new Git repositories and contributed to development workflows. Performed cross-browser analysis and QA reviews to ensure functionality and high-speed performance across devices.
